Getting Startup and Registering Devices 0003

If this is the first time you have added a new device to our platform, you should first register with it (new user), since in this way it will be much easier to incorporate new devices and their management.

1. Connect the device.
2. Look on your phone or laptop WiFi generated by the new device (** AVF_Smart **).
3. Connect to this network.
4. Access the device configuration (192.168.4.1).
5. Configure network parameters.
6. Disconnect from the home network.
7. Click on the link that appears in the configuration sheet.
